

HAD GOOD SPORTS

Annual Field Games at Kamehameha School.

A LONG LIST OF EVENTS

Seniors and Juniors—Favorite Day—Band Music—Sharp Contests—A Dinner.

Field sports, in honor of Founder's day, were held on the Kamehameha school campus Saturday afternoon. A good breeze blowing out of the north, made the day a comfortable one for the great crowd of spectators and for the participants. Though there was not the keen competition which lends interest to a contest between two rival colleges, the boys were ambitious and did good work.

There were eighteen events on the program, six belonging to the juniors and twelve to the seniors of the school. The field officers being men of experience, and knowing the time it would require to run off such a lengthy program, deftly managed to pull off two events at a time, finishing the sports by 5:15. The boys seemed to have a greater interest in the pole vaulting than in the other contests, working long and hard for first place.

In the evening the seniors were given a banquet by the members of the Girl's school.

Captain Berger's band furnished the music.

The events with winner and records were as follows:

JUNIORS.

Running broad jump, distance 16 feet 5 inches—J. Pa, first; U. Lemon, second; H. Aikue, third.

Running high jump, height 4 feet 10 inches—W. Searle, first; U. Lemon, second; E. Hardee, third.

Fifty yard dash, time 6:2 seconds—W. Campbell, first; J. Pa, second; A. Hotendrof, third.

Throwing 12-pound hammer, distance 81 feet 6 inches—J. Hose, first; M. Hardee, second; J. Nahone, third.

Pole vault, height 6 feet 6 1/2 inches—U. Lemon, first; J. Pa, second; E. Hanauko, third.

One hundred yards low hurdles, time 15 1/2 seconds—H. Hanakahi, first; J. Pa, second.

SENIORS.

Running high jump, height 5 feet 4 inches—C. Paehaole, first; J. Mahoe, second; J. Poo and J. Cockett tie.

Putting 16-pound shot, distance 35 feet 9 inches—J. Burgess, first; S. Kalua, second; J. Poo, third.

Fifty yard dash, time 6 seconds—J. Fern, first; Harbottle, second; S. Kalua, third.

Four hundred and forty yards run, time, not taken—D. Kalol, first; L. Alau, second; T. Cummings, third.

Running broad jump, distance 19 feet 10 1/2 inches—J. Fern, first; E. Amoy, second; J. Burgess, third.

Throwing 16-pound hammer, distance 91 feet 2 inches—J. Burgess, first; J. Nahale, second; F. Kanae, third.

Two hundred and twenty yards dash, time 27 1/2 seconds—S. Kalua, first; J. Kuoha, second; C. van Giesen, third.

Pole vault, height 9 feet 3 1/2 inches—J. Fern, first; second and third, tie.

Eight hundred and eighty yards run, time 2:30—D. Kalol, first; L. Alau, second; J. Kalaina, third.

One hundred yards high hurdles, time 15 seconds—J. Cockett, first; D. Harbottle, second; F. Cockett, third.

One hundred yard dash, time 11 1/2 seconds—D. Kalol, first; D. Harbottle, second; S. Kalua, third.

A POISON USED.

Method of Wholesale Slaughter of the Mosquito.

The Mexican Central Railway Company is engaged in a new experiment which, if it is all that is claimed for it, will be of incalculable value to the residents of this city. To show how earnest they are in the matter, they have created a new office—that of mosquito commissioner—and the portfolio was awarded to Captain George C. Sperry, superintendent of telegraphs for the company.

Experiments in different parts of the United States, and in New Jersey in particular, have demonstrated the fact that the extermination of the mosquito can be accomplished.

An exchange, in discussing the matter, said:

"Scientific investigation has disclosed the fact that a few grains of permanganate of potash will destroy all the embryo mosquitoes in a very large area of mosquito swamp. At two cents an acre all the mosquitoes can be killed off for a space of thirteen days, and as the breeding time is but two months, four cents will assure protection for the entire year. This places it within the possibility of a state, and certainly a city, to entirely rid itself of a great nuisance."

April and May are the two months in which mosquitoes breed. They are

purely local in their habits, and their migration, as some suppose, and they seldom move more than a hundred feet from the place of their birth. Hence, to exterminate the breed in a certain locality would rid that locality of the pest for that season at least, and the method of extermination is so inexpensive that an entire community may be rid of them at a very small expense.

Hand Car Fatality.

If a railway man were killed in the States through any instrumentality of a hand car his family would consider it a lasting disgrace to the tribe's custom and his friends would whisper that he had come to an ignominious ending. This was the sad fate of a Japanese. Three Japs were on a car going into Waiakua. There was a derailment on a down grade. Two of the men escaped without a mark. The third landed on his neck, was paralyzed and died in a few hours. It is stated that an inquest is not necessary.

A HEART BOWER

Marriage of Miss E. Parker and Frank Woods.

A Grand Event at Mana—Those Prominent in the Ceremony. Decorations—Supper.

(Special Correspondence.)

At Mana on Wednesday the 14th inst. Miss Eva Parker, daughter of Mr. and Mrs. Samuel Parker, was married to Mr. Frank Woods of Kahua. The event was a social success in every way. The bride was given away by her father with Miss Alice Woods as bridesmaid. The bridegroom was escorted by his brother, Mr. Samuel Woods.

The marriage hall was most beautifully decorated with wreaths of smilax and roses; and the bridal couple stood under an archway of flowers, representing two entwined hearts, artistically placed by Mr. Ernest Parker. The Rev. M. Tompkins of Paunilo, officiated. The bride was attractively dressed in a cream satin gown, trimmed with point d'alecon and valenciennes.

After the ceremony the bridal couple led one way to the dining hall, where a sumptuous supper, ala Hawaii, was laid. Numerous toasts were offered the most prominent being to the happy couple, to Mr. and Mrs. Parker and to Princess Kaiulani.

From the dining hall the guests repaired to the dance hall, where the quintette club of Honolulu furnished music till daylight, at which time the bridal couple departed, amidst showers of rice and old shoes, for their new home.

Among the most notable guests present were Princess Kaiulani, Prince David Kawanakoa, Prince Cupid Kawanakoa and wife, Mrs. S. Cockett, Mrs. M. Keohokaloie, Major A. H. Mickerson, U. S. A., Captain Lydig, U. S. A., Captain J. Ross, Hay Wodehouse, R. Hind and wife, Mr. and Mrs. J. Jarrett, Mr. and Mrs. C. Nottley, Mr. and Mrs. Stillman, Mr. and Mrs. L. A. Heibel, Mrs. R. Parker, Mrs. K. Kaana, Mrs. E. J. Parker, Mrs. F. Spencer and daughters (2), the Misses Woods (3), the Misses Randall, Clara Low, D. Richardson, Bell (2), K. Vida, Robertson, Richardson, E. Low, Messrs. S. Woods, P. Parker, W. C. Sproull, P. Phillips, B. Gallagher, P. Vida, W. Fredenburg, H. Akona, C. Williams, R. Parker, Jr., S. H. Mahuka, L. Paakiki, I. Pitt, J. C. Austin, A. Kaana.

Forestry Fire.

Saturday, shortly after noon, a fire broke out 100 yards below the Government nursery on Tantalus. Mr. Haughey went up with a force of men and succeeded in putting out the fire before it destroyed much timber. About an acre was burned over. The police were immediately notified but no trace of the culprit who started the blaze has yet been found.

TWO POINTED QUESTION ANSWERED.

What is the use of making a better article than your competitor if you can not get a better price for it? Ans.—As there is no difference in the price the public will buy only the better, so that while our profits may be smaller on a single sale they will be much greater in the aggregate.

How can you get the public to know your make is the best?

If both articles are brought prominently before the public both are certain to be tried and the public will very quickly pass judgment on them and use only the better one.

This explains the large sale on Chamberlain's Cough Remedy. The people have been using it for years and have found that it can always be depended upon. They may occasionally take up with some fashionable novelty put forth with exaggerated claims, but are certain to return to the one remedy that they know to be reliable, and for coughs, colds and croup there is nothing equal to Chamberlain's Cough Remedy. For sale by all druggists and dealers. Benson, Smith & Co., Ltd., agents for H. I.

NOT THE STOCK

John M. Horner's Defense of His Forestry Paper.

FURTHER FACTS ARE PRESENTED

Close Observation in Hamakua. Not "Decidedly Wrong"—He is Ready to Demonstrate.

EDITOR P. C. A.—I am in viewing my report on Forestry at the late Planters meeting, some of its members express the belief that I am "decidedly wrong" when I state that "stock does not injure forests as much as man, fire and worms."

It must be remembered I was writing respecting the destructive enemies to our Hamakua forest on the Island of Hawaii, which is one of the largest forests of the group, where I have seen various enemies of the forest at work the past sixteen years and write from a knowledge of the facts. I know I am not mistaken. I am not in the habit of writing theory for facts.

I am but slightly acquainted with other forests of these Islands, save the one above mentioned. Other forests may differ from this. They may contain a kind of tree that stock will kill. There may be no destructive worms there, and perhaps no fires. On the other Islands the forests are so small, man has encroached upon them but slightly and my belief is, if the truth was known, stock has injured them still less.

If any doubting Thomas will come up here, I can show him hundreds of acres of dead koas. Not one was killed by either man, fire or stock. Worms destroyed them. I see them at work. Fire and stock leave their mark upon trees they destroy. Their mark is not on these trees. Yet they are dead.

I will show a young ohia forest that has grown up the past thirty years. It is vigorous, with horned stock in plenty in it all these years. Mr. Wilson told me he had a part of this land rented years ago, and he got 1000 hides a year from the wild cattle in this forest. If men's theories were true about stock destroying forests, this forest should be all dead, instead of now being in vigorous growth, excepting where it has been encroached upon by man. One may ride hither and thither over it for days without finding so much as one tree killed by stock. It is true there are long strips of old ohia forests dying and falling, both where stock run and where none have been for a score of years, that seemingly died from old age. They had lived out their generation, which is the only way I can account for their being dead. Neither man, fire or stock killed them, I am quite sure. Stock will kill the young koa tree under the conditions named in my report. There may be other exceptional cases, but being exceptional, they are not worth naming.

It would be interesting if some one would give in detail how stock destroy forests, as I have lived among stock and near large forests most of my life and never taken it in and have yet to see the first forest destroyed by stock. In referring back to the days of my youth in New Jersey, farmers there were very particular to have shade for their stock in all their pastures. These shade trees were apple, pear, hickory, black walnut and forest, all of good size, but not so large as the ohia and koa grown here. Yet during the fifteen years my mind runs back, not even one of those trees was ever destroyed by stock. I think it would be well for those who feel a deep interest in forest preservation, to look beyond stock for the principal enemies of Hawaiian forests.

JOHN M. HORNER.

Fair a Big Success.

Fully one thousand of the people of the city patronized on Saturday afternoon and evening the fair of the Kamahele church people. The large room for the bazaar, as well as the yard, had decorations placed with the attractiveness so marked in the work of Hawaiians in this line. Mrs. J. B. Atherton, Miss Nellie Judd and a number of other ladies of Central Union were on hand to assist in the good work. At the several booths there were displayed hundreds of pieces of the handiwork of the women and girls of Hawaiian homes. These goods were purchased generously not only for Christmas presents and souvenirs, but often for their real worth in daily life about the house.

Eczema, scald head, hives, itchiness of the skin of any sort, instantly and permanently cured. Doan's Ointment. At any chemist's. 60 cents.

Capt. Morse, of the ship Fort George, is nursing a sprained ankle and a tender spot under his ribs, the result of a fall on deck while on the voyage up from Newcastle. The Fort George arrived last Saturday afternoon, coal laden, for Wm. G. Irwin & Co.
